Aluminium Venetians

Aluminium Venetians are great for all window shapes and sizes.

They can even be fitted to doors.

They have a small head box that can fit into the narrowest of recesses.

They are great in providing light control and privacy with just a twist of the control wand.

We use the world famous Ultrawand. Which is a great safety device.

Aluminium Venetians come in a great range of colours, from gloss, matt, mettalic and even perforated. With two different blade sizes 25mm or 50mm.
