

Roller Blinds

Roller blinds are very versatile, they come in the largest range of fabrics from light filtering, sunscreens to full black out.

They can be used in all different applications from small windows to doors.

They can be motorized and linked together or driven off the one chain drive, using multilink.

They can be finished with a modern bottom rail or a sewn in timber lathe.

Gone are the days of the old spring loaded operation.

They are chain driven and can easily operate the heaviest of blinds with the addition of a spring assist.

We have a massive colour and fabric range to choose from with fabrics from Australia, England and France .

Combination brackets can be used to have both Privacy and Views using combo Brackets.
