## Roman Blinds

*Roman blinds have to be one of the classiest blinds of all.*

*There are a multitude of colours and textured fabrics that can suit any room or decor.*

*They can have matching Panel Glides with the same timber battens.*

*Roman blinds work best when they are face fit onto a wall above the window opening.*

*This allows you to recess a sunscreen roller blind underneath, the Roman, when up acts as a stylish pelmet.*

*Achieving a great combination or light control and blackout.*

*Beach Romans are a traditional calico fabric with stained timber battens to the front and back of the blind.*

*They work well with polished floorboards, bamboo flooring.*

*They are normally a light filtering blind used in lounge rooms.*
