Timber Venetians

Timber Venetians add warmth to any room.

They are great for light control and still achieving privacy.

They can come in Basswood, Cedar and PVC for wet areas such as Kitchens .

White venetians can also look stunning in any room for the clean crisp feel.

The head box is finished with a timber fascia to look elegant and streamline.

We only use local Australian made blinds and will not sell inferior blinds.

Timber Venetians have had a bad name over the years with cheap imported blinds flooding the market. A large number of major companies are now passing these blinds off as Australian made blinds

Buyer Beware!! If the controls are one either side of the blinds they are imports designed to be cut-down to suit.
