## Vertical Blinds

*Who said the old vertical blind has to look dull and boring?*

*With sewn in bottom weights and a soft rounded edge track, the 21<sup>st</sup> century vertical has arrived.*

*Try something a little different by making them a feature adding a point of difference too your sliding door.*

*With great light control and privacy by twisting the wand to move the slats.*

*Wands are a great safety device and also great for the elderly, we feel these are easier to use and create less stress on the body to operate. Drag the wand to open the blind, twist the wand to tilt the slats.*

*Vertical blinds have come a long way.*

*With great new range fabrics & colours to choose from.*

*Take a new look at this product and be pleasantly surprised!*
